

LADANG EMAS TEKNIK

Perfects Products & Services is Yours

LADANG EMAS TEKNIK

ABOUT US

Ladang Emas Teknik (LET) started its journey from simple idea to provide the Indonesian Lift Engineering Services with a focused product & service approach. The success and lessons learnt since 2018 can be summarized in one word that is entrenched in the LET way of doing business – Growth

VISION

01

Continue to grow the business by supplying innovative solution, services and product support that add value to customers.

02

To be the preferred supplier in Indonesia for all Lift Engineering Services requirement.

MISSION

Use technology and innovation to drive growth and business development

LADANG EMAS TEKNIK

OUR PRODUCT

HYDRAULIC PARTS

We are experts in providing hydraulic system products & services including Hydraulic Pumps, Valves, Motors, Cylinders, Hoses, Piping and Tubing. Premium brands with international quality we can supply such as Rexroth, Eaton, Parker, Commercial Shearing, Danfoss, Hydac, Powermatics.

01 Hydraulic Pump

Hydraulic Pumps includes displacement models of variable piston, fixed & vane and fixed gear pumps. Designed to handle a wide range of applications.

LADANG EMAS TEKNIK

OUR PRODUCT

HYDRAULIC PARTS

02 Hydraulic Valve

Valves for use in hydraulic applications available in a variety of types and configurations. Valve can be manual, motor actuated or solenoid air operated and electrically actuated.

03 Hydraulic Motor

Hydraulic Motor including Bent Axis, Brake, Gear, Radial Piston and Vane Motors

LADANG EMAS TEKNIK

OUR PRODUCT

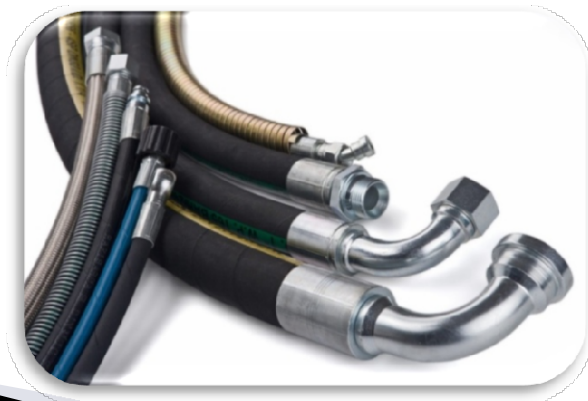

HYDRAULIC PARTS

04 Hydraulic Cylinders

Hydraulic cylinders can be engineered for a wide range of applications, offering innovative designs tailored to unique operational needs. Known for their durability, power efficiency, and load-handling capability, hydraulic cylinders are often the superior choice in industrial scenarios.

05 Hydraulic Hoses, Piping and Tubing

Hoses and tubing are integral components of high pressure systems that control motion, and low pressure systems that transfer materials from place to place.

LADANG EMAS TEKNIK

OUR PRODUCT

MECHANICAL PARTS

Mechanical components are the building blocks of various machines, devices, and systems. These elements come together to form complex mechanisms that power industries.

01 Bearings

Bearings are used to reduce friction between moving parts, allowing smooth rotation or linear motion. They support loads and minimize wear and tear, increasing the lifespan of machines.

02 Pulley and Belts

Pulleys and belts are used to transmit power and motion over distances. Pulleys are wheels with a groove around their circumference, and belts are flexible loops that connect two pulleys.

LADANG EMAS TEKNIK

OUR PRODUCT

LIFTING DEVICES

Ladang Emas Teknik (LET) is a leading supplies & services company that offers products are designed based on engineering calculations and real field requirements, and our manufacturing processes are carried out with a strong focus on quality, traceability, and consistency. Premium brands with international quality we can supply such as., JCM Load Monitoring, LCM System, Doowin, etc.

LADANG EMAS TEKNIK

OUR PRODUCT

LIFTING DEVICES

01 Water Bags for Load Testing

Water Bags filled load testing bags are designed for proof load testing of the lifting equipment and structures, which is newly finished, or periodic check or maintenance. Such as crane load testing, beam load test, lifeboat davit load test, derrick load testing, overhead crane load test.

LADANG EMAS TEKNIK

OUR PRODUCT

LIFTING DEVICES

02 Load Cells

Load cells, load monitoring systems and radio telemetry solutions for use in a wide variety of weighing and force measurement applications. We are supplier of products and systems to many major Oil and Gas companies, as well as operating in Marine, Lifting, Crane, Construction, Automotive and many other Industrial areas.

LADANG EMAS TEKNIK

OUR SERVICES

Rental Water Bags, Concrete, Portable Load Cell, Wire Rope Tester

We offer rental options for our water bags and load test equipment, concrete, portable load cell, wire rope tester. Whether you need them for a short-term project or a specific test, we provide flexible and cost-effective rental solutions.

LADANG EMAS TEKNIK

OUR SERVICES

Lifting Gear Inspection / Load Test

Lifting Gear Inspection / Load Test is a critical process to ensure the safety and reliability of equipment used in lifting operations. It involves a systematic examination of various components, including wire ropes, shackles, chains, and slings, to identify any wear, damage, or deformation that could compromise safety and performance

LADANG EMAS TEKNIK

OUR SERVICES

Crane Maintenance & Repair

Crane Maintenance & Repair is essential for ensuring safe and efficient operation. Regular maintenance help prevent unexpected failures and ensure compliance with safety codes, reducing legal liabilities.

LADANG EMAS TEKNIK

OUR EXPERIENCE

2018

PT. Depriwangga OM

Supply Hydraulic Swing Lock,
PN N62934-901

2019

PT. Indospec Asia

Supply Hydraulic Motor,
Model No. WM5A1 978 BE OL22-7,
Parker Commercial Hydraulics
Supply Swing Brake, PN 13-547-072,
Mico Brake

2022

PT. Depriwangga OM

Supply Bendix Drive 11 Teeth
(Non-Spark Pinion), PN M38AB1XNS,
Powerstart
